Notifications

What are they for?

How do they work?

Notifications

What are they for?

When customers submit a request through the customer portal, they receive notifications to keep them informed of their request's progress.

How do they work?

Notifications

What are they for?

When customers submit a request through the customer portal, they receive notifications to keep them informed of their request's progress.

How do they work?

JIRA can send email notifications to users when significant events occur (e.g. creation/completion of an issue).
